

Clackamas Community College

RFQ2021-01 Oregon City Conceptual Master Plan
Addendum 1

Questions/Clarifications:

Q: Is the Owner expecting "planning/architectural/engineering" team responses to include MEP consulting engineers, or are you expecting the selected team to coordinate with the team you will have already selected for the MEP infrastructure study/design project?

A: This Conceptual Master Plan does not include any MEP elements related to existing buildings. The work will be covered under the current scope of the MEP Master Plan. This RFQ's Master Plan will include engineering associated with but not limited to traffic, parking, water supply, sanitary sewer, storm water, natural gas and electrical infrastructure capacity for future growth. The College doesn't anticipate any coordination between the two teams at this time.

Q: What is the proper submittal method for the RFQ? Just the emailed PDF, or both the email and a hard copy?

A: An emailed copy of the signed PDF will be accepted as the submittal method for this RFQ.
